DENTAL CLINIC

Brand & Print Kit

DR. YOUSSEF NASSER · DENTAL IMPLANTS & MAXILLOFACIAL SURGERY

د. يوسف ناصر · زراعة الأسنان وجراحة الوجه والفكين

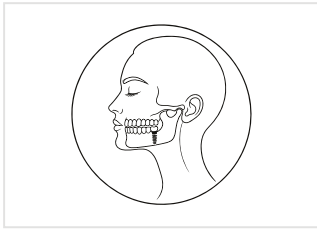

The mark

A left-facing profile in gold monoline inside a gold ring: the skull read through the cheek, the tooth rows meeting on the bite plane, and an implant seated in a lower molar. The mark and the hero illustration on the website are the same face drawn twice — once in line, once in wash.

VARIANTS

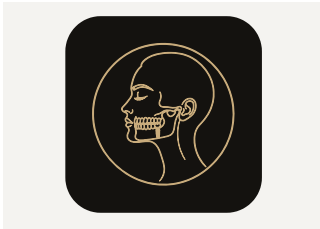

Gold on ink
logos/svg/ozea-mark-on-ink.svg

Ink on paper
logos/svg/ozea-mark-ink.svg

White on ink
logos/svg/ozea-mark-white.svg

Avatar tile
logos/svg/ozea-mark-tile-ink.svg

CLEAR SPACE AND MINIMUM SIZE

Clear space. One quarter of the mark's diameter on all four sides. Nothing crosses it — no type, no rule, no photograph edge.

Minimum size. Medallion 9 mm wide; stacked lockup 22 mm wide. Below those the 2.4 pt monoline fills in on uncoated stock and the engraved DENTAL CLINIC line closes up. For anything smaller — a stamp die, embroidery, a favicon — use the thickened master, ozea-icon-.*.

Foil and emboss. The ring and the linework can be foiled from the same vector. Specify a metallic gold from the Pantone Metallics range and approve a physical draw-down on the actual stock — a metallic cannot be judged from a screen or a CMYK proof.

THE LOGOTYPE

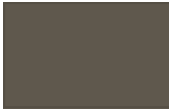

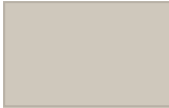

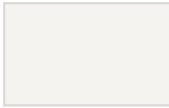

Cinzel, weight 500, tracked 0.34 em, with the first letter indented by the same amount so the block stays optically centred. DENTAL CLINIC sits below at 0.42 em. The engraved rule is drawn, not bordered: at logo scale a border plus positioned diamonds drifts by a fraction and reads as a printing fault. Cinzel is used for the logotype and for nothing else.

DO NOT

- Do not re-draw, re-trace or re-weight the linework. Every file is cut from brand/logo/*.svg.
- Do not set OZEA without its tracking, and never in another face. Cinzel, 0.34 em, is the logotype.
- Do not put the gold mark on a mid-tone. It is gold on ink, ink on paper, or white on ink.
- Do not stretch, rotate, outline, emboss in software, or add a drop shadow.
- Do not place the mark inside another ring, badge or frame — it already has its own.
- Do not print the gold as a tint of black or as a screened yellow. It is a solid build or a foil.

PALETTE

	Surgical Ink #14120F · RGB 20 18 15 · CMYK 0 10 25 92 Headlines, the card front, both document headers.		Body Ink #5F584D · RGB 95 88 77 · CMYK 0 7 19 63 Running copy on paper.
	Warm Gold #C9AC7C · RGB 201 172 124 · CMYK 0 14 38 21 The mark, rules, bands. The only accent, and rationed.		Micro Ink #6B6459 · RGB 107 100 89 · CMYK 0 7 17 58 Labels, logistics, captions.
	Measured Gold #C0A578 · RGB 192 165 120 · CMYK 0 14 38 25 Screen measurement accent. Not used in print.		Sand #CFC8BC · RGB 207 200 188 · CMYK 0 3 9 19 Ground tint. Screen ground, print panels.
	Ink Secondary #3A352F · RGB 58 53 47 · CMYK 0 9 19 77 Subheadings and secondary names.		Paper #F4F3F0 · RGB 244 243 240 · CMYK 0 0 2 4 The card reverse and the prescription footer band.

CMYK values above are an un-profiled conversion. They are a starting point for a job sheet, not a colour proof: ask the printer to convert with the house profile, and approve a wet or digital proof on the actual stock. The gold in particular goes muddy if it is built as a screened yellow — it wants a solid build or a foil.

TYPE

CINZEL 500 · LOGOTYPE ONLY	O Z E A
INTER TIGHT 500 · NAMES	Dr. Youssef Nasser
INTER 400/500 · DATA, LABELS	+20 106 979 9460 · Every day 24/7
IBM PLEX SANS ARABIC · ARABIC	د. يوسف ناصر · زراعة الأسنان وجراحة الوجه والفكين

All four faces are open licence (SIL OFL) and are embedded in every PDF in this kit, so a printer needs nothing installed. Arabic sets in Plex with Western digits, the way Egyptian clinics quote numbers and the only way a phone number stays aligned.

PRINT SPECIFICATION

PIECE	TRIM	BLEED	STOCK AND FINISHING
Business card	90 × 50 mm	3 mm	350–400 gsm uncoated, soft-touch or matt laminate
Prescription A5	148 × 210 mm	3 mm	90–100 gsm uncoated offset, padded 50 leaves, glued head
Letterhead A4	210 × 297 mm	3 mm	100–120 gsm uncoated offset
Brand guide	210 × 297 mm	none	Digital, or 120 gsm for a desk copy

Every PDF carries an exact TrimBox and BleedBox, so cut to the TrimBox and ignore the page edge. Files are RGB with embedded fonts and live vector artwork; convert to the house CMYK profile at output. A *-proof-with-marks.pdf of each piece shows the cut, and ozea-business-card-a4-10up.pdf gangs ten cards on A4 for a digital press, long-edge duplex.
